Company Profile

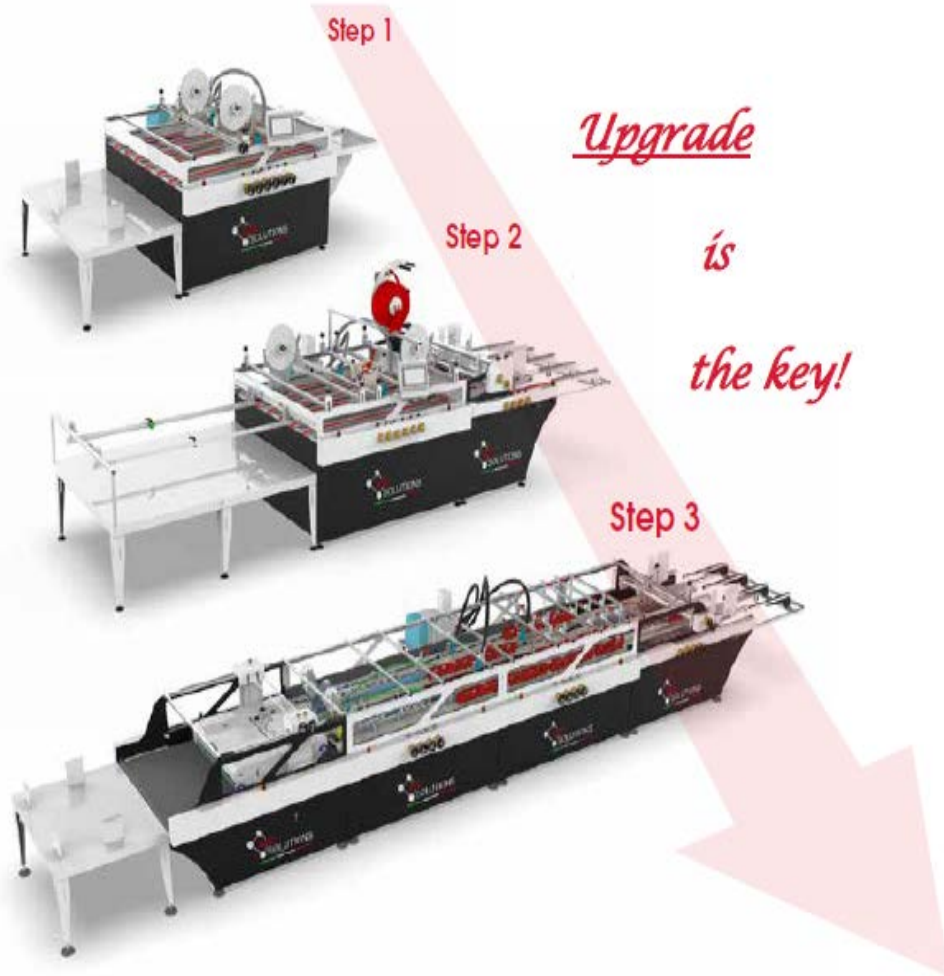

Company Purpose

Knowledge and experience of qualified staff, in combination with latest designing tools, assembling procedures and modern, highly- specialized mechanical department, enables us to create innovative machines with simple operation, short set-up times, high quality standards and modern design.

Our Purpose: to value creation from brand owner to consumer with our range of machines,

Company Vision

Standards are OK, but personalisation is better.

Technical expertise, design and manufacturing capabilities, innovation, are all components of a company vision aiming at finding the right solution to each and every requirement presented by a potential customer.

Standard configuration help accelerate the process, but personalization is the key to satisfying the needs of the market.

Company Mission

Higher quality, improved productivity and reduced operating costs are the main goals.

APR Solutions designs and manufactures modern and cost-effective compact size folding, gluing and taping machines for small and medium run in traditional offset or digital printing encompassing the high performance of the machines/production lines meeting thus the increasingly complex customer requests

Milestone

2015

APR Solutions srl is born and the 1st trademark product is launched.

2020

APR Solutions purchases the historical die-cutting and hot foiling machines' company, Saroglia.

2016

APR Solutions moves in a bigger production unit for the 1st time.

2024

APR Solutions increases for the 3rd time its production facility by building a new production and office unit connected to the already existing one.

2019

APR Solutions purchases the 1st production unit, increasing thus the production facility for the 2nd time.

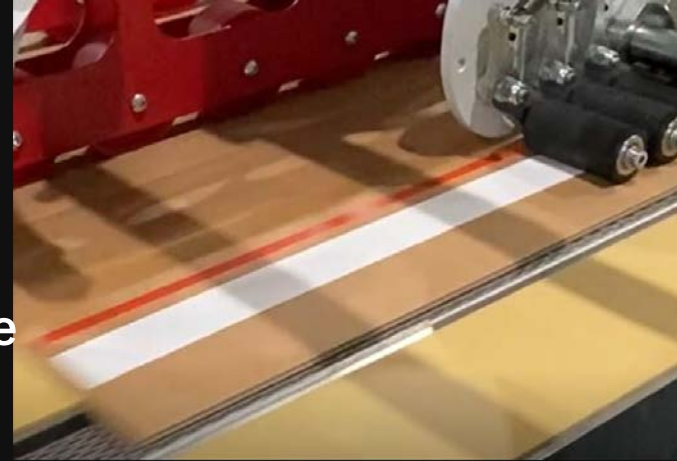

Our Company History

APR Solutions is a fast-growing company established in 2015. The global headquarter located in Rondissone, Italy incorporates advanced engineering and research departments, in addition to a sophisticated machine shop for the production and assembly of our equipment and accessories.

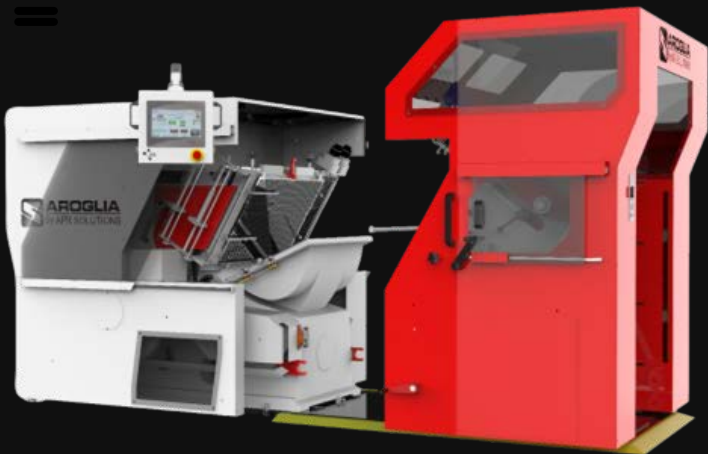

Our Services

Design and manufacturing of folding-gluing and tape application machines.

APR Solutions has concentrated on developing and manufacturing paper and carton converting machines for the finishing and packaging industry, as well as tape solutions for the industry needs.

Crash lock bottom

Our Products

Folding and gluing machines

03.

Folding and gluing machines for bags:

- **Pochettes Bag 1 machine**
Bag production machine with 1 double-sided tape application
- **Pochettes Bag 2 machine**
Bag production machine with 1 double-sided tape application
1 tear-tape application
1 silicon tape application

Kraft paper bag with double-sided tape application

Kraft paper bag with:

- double-sided tape application
- tear-tape application
- silicon tape application

Our Products

Tape application machines

04.

Tape application machines for paper and cardboard :

- **Mini Athos machine**
50 cm wide manual machine
- **Athos**
70 cm wide semi-automatic machine
- **Athos Plus**
70 cm wide automatic machine

Applications on:

- paper
- corrugated cardboard (flute type E, B, C, A, BC)
- carton
- acrylic
- PVC, plastic, polypropylene
- wood
- aluminum
