## AUTOMAZIONI INDUSTRIALI

*Technology for safe, flexible and  
human-friendly production*

*Engineered Solutions for Glass Production Process*

*High Tech 'custom made solutions'*

## COMPANY

Studio 1 Automazioni Industriali was established in 1985 and is located in Sassuolo district in Northern Italy. The Company was initially set up as a technical designing and Engineering company and based its work mostly on the development of industrial automations and acted as technical advisor and supporter for important Italian industries.

On 1990 Studio 1 was transformed from just an engineering team to a company with its own production units and thanks to the technical experience acquired in a few years Studio 1 becomes a specialist company and manufacturer of complete plants for ceramic, glass, aluminium industry and automations in general.

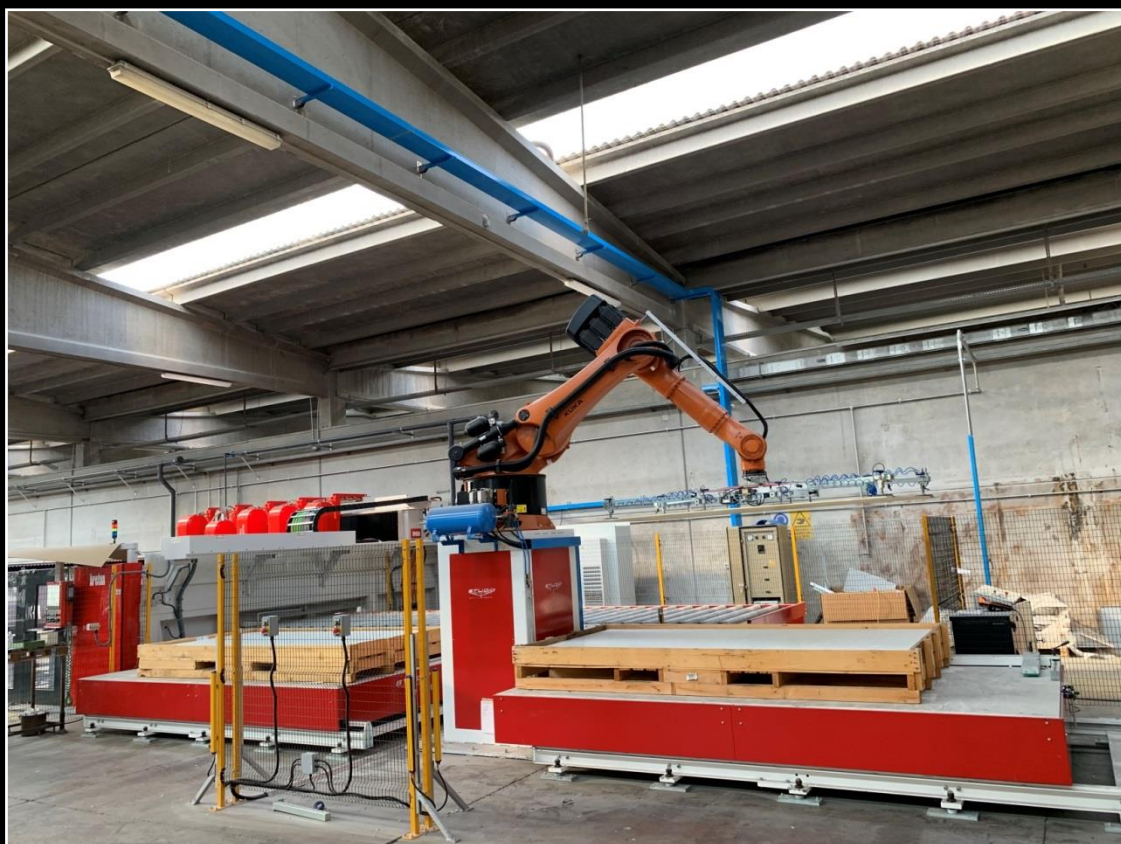

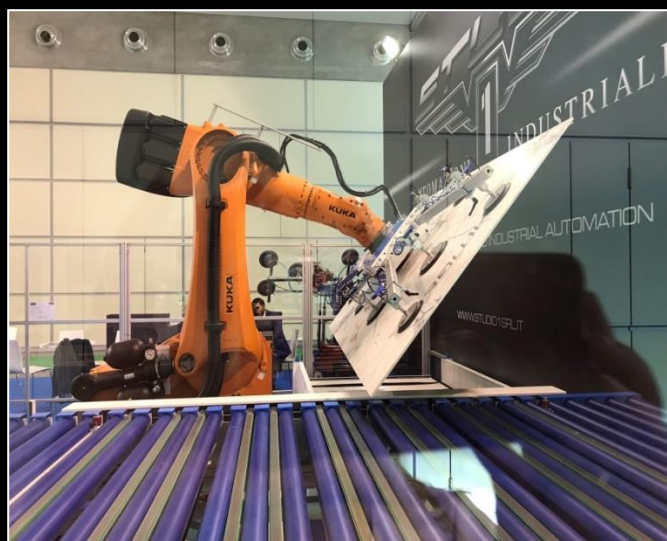

Our growth and our commitment in supporting the projects and the ideas of industrial companies never stopped, with the awareness that the more simple ideas are the ones able to leave a mark and generate things that hold over the time.

*Studio 1 Automazioni Industriali is a customer oriented Company, which offers each customer a CUSTOM SOLUTIONS and complete service (from design to after-sales assistance)*
