madeinitaly.gov.it

ITA - Italian Trade Agency is the government agency officially tasked with supporting the international business development of Italian companies and promoting the attraction of foreign investment to Italy.

With a motivated and modern organization of offices in 70 countries around the world, ITA provides information, assistance, consulting, and training to Italian small and medium-sized modern multi-channel promotion and communication tools to assert the excellence of 'Made in Italy' globally.

It is directly involved in promoting and fostering exports and cooperation in all areas - industry (consumer and capital goods), agricultural technology and agri-food, services, and training. The ITA works closely with the Italian Regions, the Italian Chambers of Commerce, business organizations and other public and private entities.

Its headquarters is in Rome and its network of offices around the world act as "Trade Promotion Sections" of the Italian Embassies or Consulates.

ACIMAC is the national trade association that represents and supports the Italian suppliers of plant, machinery, equipment, semi-finished products, raw materials, design and services for the ceramic (ceramic tiles, sanitaryware, tableware), heavy clay and refractories industries. It has more than 80 member companies, including the industry leaders.

ACIMAC member companies, although most operate in the provinces of Modena and Reggio Emilia (home to the world's most important ceramic manufacturing district), enjoys a world leadership position, with a world market share of 50%, and an annual turnover of over 2,350 billion euro in 2022.

Thanks to its unrivalled level of excellence and the fact that produces the most competitive plants that modern technology can offer, the Italian sector continues to have an export share of almost 1,690 billion euro, maintaining thus also in 2022 a 72% export quote of its total annual turnover.

The largest market area is the European Union. In second place is Asia, next come Middle East, South America, North America, non-EU Europe, Africa, China and Oceania.

SYSTEM CERAMICS

🏠 Via Ghiarola Vecchia, 73 | 41042 Fiorano Modenese (MO) | Italy
☎ 0536836111 | ✉ info@systemceramics.com | 🌐 https://www.systemceramics.com/en

BOOTH #35103-36102

System Ceramics is a company of Coesia Group, that designs and produces process systems for the ceramic tile industry worldwide.

It has reached and maintains a position of leadership in the market through constant investments (5% of its annual turnover) in research and development, in the various departments of the company that develop innovative and avant-garde technological solutions.

ITALIAN CERAMIC TECHNOLOGY

Italy is undeniably a world leader of ceramic technology and a hub for innovation, with Italian ceramic machinery manufacturers offering a wide range of advanced equipment, ranging from smaller equipment to complete tile processing lines. Italian companies not only offer the most versatile and technologically advanced machines on the market, but customized solutions as well, allowing customers to process their products at competitive prices.

When you buy Italian equipment you're entering into a partnership with the world's most highly skilled engineers and manufacturers. The result is a smarter approach which combines sophisticated technology, flexible solutions, and competitive pricing to meet your needs. Not surprisingly, Italy has earned a reputation as a world-class supplier of engineering technologies, machinery and equipment across a wide range of manufacturing sectors.

The Italian ceramic machinery manufacturing sector includes around 140 companies with over 7,000 employees and an annual turnover of over 2,300 billion euro.

Italy's steady international growth in this sector is built on a firm tradition of knowledge, a constant drive for innovation, ongoing applied research and an extensive presence in all world markets. With an unrivaled level of excellence and producing some of the most competitive plants that modern technology can offer, it delivers industry technologies and expertise worldwide.
