SEPTEMBER 23 – 25, 2019 • LAS VEGAS, NV USA

**#1 WORLDWIDE SUPPLIER
OF PACKAGING SOLUTIONS**

Ministero dello Sviluppo Economico

The Ministry of Economic Development is a government ministry of the Italian Republic. It deals with production, economic activities, energy and mineral resources, telecommunications, consumers, internationalisation and business incentives. The Italian Ministry of Economic Development possesses the tools for allowing key factors affecting the country's economic growth to be managed in a unified and integrated way. These tools aim to support companies along the difficult path of globalisation and, recognising that the government's task is to stimulate, facilitate and sustain healthy upward forces on the economy, shall be used in a co-ordinated and consistent manner.

Supporting the Italian economic system beyond the country's borders is a top priority and this will see Italy launching a new export challenge. The opening up of markets will bring about great development opportunities for the Italian economy. Italy can seize these opportunities by reinforcing its presence abroad in an increasingly cohesive and integrated manner. The Ministry of Economic Development is committed to achieving this goal.

UCIMA (Italian Packaging Machinery Manufacturers' Association) is the national trade association which represents and supports the Italian packing and packaging machinery manufacturers. It has more than 130 member companies from all over the country, including the industry leaders.

UCIMA member companies cover the entire range of packaging machinery production, from the food, confectionery and tobacco industries through to pharmaceuticals, chemicals, petrochemicals, cosmetics and end-of-line technologies.

Italy is one of the world leaders in packaging machinery, with a world market share of 25,5%.

In 2018 the sector's turnover totaled more than 7 billion euro, with exports accounting for around 80% of total turnover.

If we were a candy factory, we wouldn't say that we produce candies, we would say that our job is to make a child smile.

We see the manufacturing of our pallet wrappers in the same way, they have to give satisfaction to the customer. They have to be satisfied by our answers before purchasing, satisfied by our solutions to their special needs, satisfied by the way we work, satisfied by the way the machine functions, and satisfied by our after sales support.

TorQ specializes in the design and construction of cappers, linear fillers and rinsers.

AP.SOL specializes in the design and manufacture of "end of line" packaging machinery.

THE ITALIAN PACKAGING SECTOR

With sales of more than 6 billion euro, the Italian automatic packaging machinery sector is a dynamic Italian industry.

It is one of the Italian sectors with the highest export propensity (more than 80%) and consists of some 200-250 industrial-sized companies, along with around 300 manufacturing units with artisanal characteristics.

Italy has a world-leading industry that competes with German manufacturers for the international leadership position. In fact, more than 50% of all automatic packaging machinery sold worldwide is either Italian or German.

The Italian automatic packaging machinery industry's leadership position is based on four essential factors: a high level of technology and product quality; an extremely high level of customization and operating flexibility of machinery; rapid after-sales support in all world markets; and a high degree of competitiveness based on the combination of large integrated groups and highly specialized small and medium-sized enterprises that, as a whole, offer a full range of machinery for all types of products.

The companies are predominately based in the regions of Emilia-Romagna (home to the highest concentration of sector companies anywhere in the world), Lombardy, Piedmont and Veneto, together accounting for more than 80% of the sector's companies. The manufacturing center is in the so-called "Packaging Valley" in the province of Bologna.

Most of the packaging machinery produced goes to the food sector (which accounts for around 60% of the industry's turnover) and pharmaceutical, cosmetics and toiletries (just under 25%), and various other sector, particularly tobacco, where the Italian machinery industry has a long tradition, chemicals/ petrochemicals and tissues.

**Machines
Italia®**

Turning innovation into productivity

Today, more than ever it is essential that manufacturers who look to maintain their respective leadership have the essential solutions and know-how which Italian companies can readily provide, to help them maintain long term growth and prosperity.

The Italian Trade Agency, via its Machines Italia project, accomplishes cohesion by creating a robust national innovation ecosystem anchored by Sixteen Italian Machinery-Manufacturing Associations Representing Over 10,000+ Companies.

Each Manufacturer Association focuses on a distinct machinery sector providing in depth knowledge and expertise for:

Agricultural & Farm - Ceramics - Earthmoving - Fluid Power Equipment & Components - Food Processing - Footwear, Leathergoods and Tanning Foundry & Metallurgical - Gears and Transmission - Glass - Marble & Stone - Metalworking - Packaging - Plastics & Rubber - Printing, Graphic & Converting - Textiles - Wood
